TECHNOLOGY

GUST

VERSION/SPECIFICATION

VSPEC-IV

RIGID ROD MOUNT

Bracket mounting system is further strengthened for stability during high-speed rotation

1.

A.B.S COMPOSITION

ABS plastic has outstanding impact resistance strength and good electrical insulating qualities. It can endure physical impacts and maintain durability under pressure due to combination of styrene and butadiene in it

4.

SILICONE BODYWORK

High tensile strength and sound dampening capability

2.

3.

DEVIATED INCLINE ANGLE

CFD redesigned to enhance aero-efficiency and create powerful air draft

5.

OSRAM GmbH. LIGHT KIT

All-new heat dissipation mechanism with enlarged surface area for heightened longevity and brightness

THE SHORTEST CEILING FAN EVER CREATED YET.

SPEED-TO-POWER

VERSION/SPECIFICATION IV

AIR POWER DERIVATIVE:

The flow draft value is calculated based on the maximum setting of the ceiling fan. It takes into account of the average diameter of the fan with reference to the velocity per second.

VERSATILITY DERIVATIVE:

The mobility value is computed based on the functionality of the ceiling fan. It takes into account of the possible avenue the ceiling fan can be used for maximum air draft effect.

VARIATION DERIVATIVE:

The customizability value is assessed based on the different sizes and colors available for the ceiling fan.

QUIETNESS DERIVATIVE:

The noise value is enumerated based on the maximum setting of the ceiling fan. It takes into account of the average diameter of the fan with reference to the decibel level.

COVERAGE DERIVATIVE:

The area of attack value is quantified based on the spread effect of the ceiling fan. It takes into account of the average diameter of the ceiling fan with reference to the area covered.
